

GOVERNMENT OFFICE
FOR THE SOUTH EAST

South East England Renewable Energy Conference & Exhibition 2005

10th-11th November 2005

Organised by  on behalf of the
South East Sustainable Energy Partnership

Building partnerships for a low carbon future

Register now to exhibit at the major Renewable Energy event of 2005 for the South East, hosted in Kent. The Conference and exhibition is aimed at:

- Developers, Architects and Master Planners
- Local Government in the SE, Planners, Energy Officers, Estate Managers, Housing Managers and Elected Members
- The managed housing sector
- NGOs and any other individuals and organisations with a commitment to the Renewable Energy agenda

A topical conference looking at the sources, opportunities and practical challenges for Renewable Energy in the South East

Informative workshops for novices to expert delegates, aiming to support the growth of the Renewable Energy market

Several exhibitors showcasing the latest Renewable Energy technologies

The full conference programme covers topics such as:

"What the South East has to do to grasp the opportunities from Renewables"

- Industry Trends
- Renewable Energy Market Trends in the South East
- Flagships and Projects in the South East

"Technologies - Installation and Good Design"

- Technologies for the South East covering Offshore wind, Community wind, GSHP, Hydro, Biomass and community scale Renewables.
- Planning and Renewable Energy
- Can Renewables add to good design?

On both days there will be workshops covering the following subjects:-

- Growing the Biomass network
- Key drivers for Renewable Energy in new developments (Target audience: developers)
- Integrating Renewable Energy into new developments through the planning process (Target audience: local government)
- Small Scale Hydro - from project to Carbon Neutral
- How to develop effective Supplementary Planning guidance
- The legislative drivers for Energy Efficiency and Renewable Energy activities
- Community owned Renewable Energy projects, ESCOs and financing for renewables
- Masterplanning and the role of Renewable Energy Case study - "Queenborough and Rushenden options appraisal for masterplanning"
- Hands on Renewable Energy technology for novices - Which technology for me?
- Micro Generation
- Climate Change Trends in the UK
- Explaining ROCs/CCL/ECA
- Ground Source Heat Pumps - Installation case study

The River Centre offers an accessible, modern conference venue with outstanding exhibition space
